

## Filtration elements – type GB

**Type GB** (gerabox) is designed for filtration and treatment of high viscosity oils up to 1000 cSt (mm<sup>2</sup>/s). The filter element removes and traps water and solid particles from **8 µm** size. The filter element is designed to remove solid particles to **NAS1638** cleanliness class **8-9**, **ISO4406 19/17/14**. The **GB** filter element is designed for the treatment of high viscosity oils in gearboxes and low pressure systems.
