

Filtration elements – typ H DoublePass, H TriplePass

Type **H Doublepass, H Triplepass** is designed for gentle filtration and treatment of oils with emphasis on removal of soft sludge, deposits, varnish, resins and particles. The filter element design provides high efficiency per flow, double or triple. Type **H Doublepass, H Triplepass** requires the use of a quick release filter body extension. The filter element removes and traps water and solid particles from **3µm** in size. The filter element is specially designed to remove solid particles to **NAS1638 cleanliness class 4, ISO4406 15/13/10**. The **H Doublepass, H Triplepass** filter element is designed for oil treatment in proportional valve and servo valve systems.
