

Filtration elements – type WE

Type WE (Water Eater) is designed for the filtration and treatment of oils with emphasis on the removal of large free water. The filter element removes and traps water and solid particles from **10µm** in size. The filter element is designed to remove free water to a level of **300 ppm** (300gm/litre) and solids to **NAS1638** cleanliness class **8-9**, **ISO4406 19/17/14**. The WE filter element is designed for the treatment of oils in low pressure systems.
